

CANTRELL/CUTTER PRINTING

Press Release

Cantrell/Cutter Printing, Inc. Converts Plant to 100% Wind Power

er 30, 2009) — Cantrell/Cutter Printing, Inc. has successfully brokered an arrangement with Clean Currents, LLC, a DC area clean energy business, to switch to 100 percent wind power in an effort to reduce dangerous greenhouse gas emissions and to encourage energy independence.

Cantrell/Cutter has always been forward thinking in processes and design which include environmental standards, and feel strongly that furthering the environmental stewardship to include renewable thing to do, but also something our clients feel

passionate about.

Clean Currents is a licensed clean energy broker and aggregator in Maryland and other locations where there is a competitive electricity market. It was established to promote solutions to today's biggest environmental challenges—global warming and air pollution, and to assist businesses in taking a greater responsibility for protecting the environment while conducting their operations.

Cantrell/Cutter is a family-owned printing company who has been in business since 1969, and is located in Capitol Heights, Maryland. Cantrell/Cutter prides itself with a reputation of continually providing its clients with a quality printed product as well as a committed professional staff.
